FOREWORD....

We are conveniently located to all points in the Pacific Northwest, Utah and California. The Union Pacific System and the Northern Pacific are readily accessible for prompt shipments either local or carlots. We have our own siding at our doors.

Fifty-four years of experience enables us to render prompt and satisfactory service. We now have 340 acres of volcanic ash soil on which is grown all the nursery stock listed herein. Our aim has always been quality and genuinesness.

We have many old and satisfied customers. We solicit inquiries and orders from new customers and feel confident you will be pleased with our stock and service.

Employees of Milton Nursery Company, with their families and friends, enjoying a picnic at Langdon Lake, in Blue Mountains.

TO THE TRADE....

Prices in this list are intended for the TRADE only. If this list should reach anyone not entitled to it we will appreciate this information so we can change our mailing list. Prices are based on present market conditions and supply, and are subject to change without notice.

The standard of grading adopted by the Pacific Coast Nurserymen is used in this list. Height given of fruit trees is approximate and represents the average of most varieties. Slow or smaller growing kinds not reaching these specifications will be governed by caliper measurements. Caliper measurements will govern the grade.

TERMS—Our terms are cash or satisfactory references before shipment; to established nurserymen who are known to us or who give us the necessary references a credit of 60 days from date of invoice will be allowed, with a discount of 3% for cash with order, 2% in 10 days, and 1% in 30 days. A liberal deposit is expected to be made on orders for future delivery. All bills must be paid by June 1st or interest accrues from then or any prior date of maturity, at the rate of 8% per annum. C. O. D. orders must be accompanied by one-fourth cash.

CAUTION—We accept all orders subject to crop conditions and with the understanding that same shall be void should injury befall stock from hail, fire, frost, error in count, or other causes beyond our control.

GUARANTEE OF GENUINENESS—If any nursery stock proves untrue to description or variety name under which it is sold, we hold ourselves in readiness, on proper proof, to replace such nursery stock that may prove untrue to description or name, or refund the original amount paid. We shall in no case be liable for any sum greater than the amount originally received for said nursery stock.

CLAIMS—For any cause must be promptly reported on receipt of stock. We will not entertain claims after goods have been once received or when report is not made within ten days after arrival of stock. We express or imply no warranty as to productiveness or life of the nursery stock we sell and will not in any way be responsible for the results obtained in transplanting.

PACKING CHARGES are made to cover the cost of boxing, or other packing material, and will be moderate.

If shipment is to be made to a pre-pay station, a remittance sufficient to cover the freight charges must accompany the order. All shipments are at the risk of the purchaser after being delivered to the carriers. Purchasers must be responsible for any loss or delay that may occur through the negligence of carriers or horticultural inspectors. We will use every means possible to secure prompt delivery but are not liable for delays in transit, and our responsibility will cease upon delivery in good order to carrier company, and the remedy for loss must lay between the purchaser and the carrier company.

Our packing and shipping season usually commences about the first to the fifteenth of October and continues until late Fall. Spring shipments are made about March 1st to May 1st, depending on the season. Five of a variety will be furnished at the ten rate; fifty at the hundred rate; and five hundred at the thousand rate.

Orders should be made on a separate sheet and not in the body of the letter, and should always show the postoffice, destination, and route and method by which goods are to be forwarded.

Price List 1932 - 1933

Fruit Tree Seedlings

We do not dig our seedlings until the leaves are well ripened and most all have fallen off naturally. We are confident, by our years of experience in growing seedlings, that this is the secret of a good stand when lined out.

The heeling in or "sweating off" process saps the vitality of the seedling. A poor stand is usually the result. Special attention is given to grading and packing.

Evergreens

We take pride in the way we handle our Evergreens. They always receive our special attention. All Evergreens are dug in the most careful manner and packed so they will arrive at destination in the best possible condition.

We will not be responsible for the life or growth of any Evergreens we sell, and will not entertain complaints or make adjustments after they have been received by the customer. If any Evergreens are found to be unsatisfactory please notify us as soon as they are unpacked.

The prices listed include balling and burlapping. Where crating or boxing is necessary, this material charged for at cost.

SOME EVERGREENS are liable to sun scald during winter and should have some protection against the bright sun on the snow, otherwise they are hardy against cold. Those varieties liable to sun scald we say in description to "PROTECT."

| ABIES concolor (White Fir) | |
|-----------------------------------------------------|---|
| · Forms a compact symmetrical form; foliage part | |
| green, silvery beneath. Withstands heat, cold and | |
| drought. Supply limited. Each | |

Peonies

MILLER'S PEONY GARDENS operated by the Milton Nursery Company, consist of fifteen acres of choice volcanic ash soil well adapted to the growing of strong well rooted plants with plenty of vigorous buds. Strong three to five eye plants are shipped. These are heavy enough for the retail trade and if desired, many of them can be subdivided and used for lining out stock. The selection of plants contained in this list covers all the very best of the standard varieties as well as many of the newest introductions. One hundred and twenty-five varieties to choose from. If you do not find the varieties you want in this list, write us and we may be able to supply them.

Our Fall shipments usually commence about October 1. The roots are best handled in fall.

Peonies like these will please your customers.
